### STOCKS AND BONDS.

New York, Aug. 15 .- Operations in to day's stock market were made up large ly of professional trading, an important proportion of the stock exchange mem bership having left the city for an end were inclined to work for a reaction, owing to the rapidity of the week's recovery in the market, which might be assume as to have built up a venerable account on the long side of the market. Lendon evidently took the same view of the situ ation and had made inroads on last The seiling by the arbitrage operations quickly carried prices down to the London level. There was also free profit-taking in Amalgamated Copper, caused by yesterday's sport. The was apparently in anticipation of a very favorable bank statement. The statement did not meet this expectation. The loan contraction in view of the week's augmented buying of securities might have been regarded as an unpleasant surprise but the senti ment of the market seemed more influ siderable gain had been hoped for. The market sold off again to about the lowest. some of the principal active stocks. The downward course of the stock market terminated for the present with the plunge of last Saturday and prices have t was not without the air of some foreible measures in the way of support for the relaxation of the pressure of liquidation of loans that the decline was arrested.
